DETAILED ACTION

Allowable Subject Matter

Claims 42-44 and 46-80 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented, for example, in independent claims 42 and 62, which include a system for detecting features of a tissue sample having an optical probe, and an accessory device for attachment to the optical probe, where at least one of the optical probe and the accessory device includes an element for providing encoded information relating to at least one of the probe and the accessory device, where the element has either a bar code or RFID chip for storing the encoded information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
